

Low Dropout Linear Regulator

General Description

The CP1117 is a series of low dropout three-terminal regulators with a dropout of 1.2V at 1A output current.

The CP1117 has an adjustable version, that can provide the output voltage from 1.25V to 12V with only 2 external resistors.

The CP1117 series provides current limiting and thermal shutdown. Its circuit includes a trimmed bandgap reference to assure output voltage accuracy to be within 1%. Current limit is trimmed to ensure specified output current and controlled short-circuit current.

Onchip thermal shutdown provides protection against any combination of overload and ambient temperature that would create excessive junction temperature.

The CP1117 series is available in the industry standard SOT-223 power package

Features

- Low dropout voltage: 1.2V at 1A output current
- Trimmed current limit
- On-chip thermal shutdown
- Three-terminal adjustable of fixed 1.5V, 1.8V, 2.5V, 3.3V, 5V
- Operation junction temp.: 0 to 125

Applications

- PC Motherboard
- LCD Monitor
- Graphic Card
- DVD-Video Player
- NIC/Switch
- Telecom Equipment
- ADSL Modem
- Printer and other Peripheral Equipment

Low Dropout Linear Regulator

Absolute Maximum Ratings (Note 1)

Parameter	Value	Unit
V _{IN}	20	V
Maximum Junction Temperature	150	°C
Storage Temperature Range	-65 ~ 150	°C
Lead Temperature (Soldering, 10 sec.)	300	°C
ESD (Machine Model)	600	V

Note 1: Stresses greater than those listed under "Absolute Maximum Ratings " may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to "Absolute Maximum Ratings " for extended periods may affect device reliability.

Recommended Operating Conditions

Parameter	Min	Max	Unit
V _{IN}		15	V
Operating Junction Temperature Range	0	125	°C

* All specs and applications shown above subject to change without prior notice.
