

Directions and Setup

Hardware Equipment:

You should have received a cardboard box containing all the hardware equipment necessary to operate this product, which includes:

- 1 x Black **SKOBYX** (referred to hereafter as "Box")
- 1 x Power cable
- 1 x Wall adapter

To begin, please plug the Box into a wall socket using the provided DC-Power cable and wall adapter.

Once plugged in, the Box will initiate the bootup sequence, indicated by a bootup sound and white blinking lights. The complete bootup process will take approximately 1-2 minutes.

Once the bootup is complete, the lights will transition to flashing blue, indicating that the Box is ready for setup.

Next, you can proceed to install the application on your device.

Software Installation:

Step 1:

In Testflight, download the **SKOBX** Application.

Note: If TestFlight has NOT been installed yet, the link will prompt you to download TestFlight first before opening the App.

TestFlight by Apple

Free

*Testflight is Apple's testing environment, allowing invited users to download the app without publishing the app to the general public.

Step 2:

Please open the **SKOBX** in Testflight and continue to follow all in-App directions to complete the setup of the Product.
